Standards and Guidelines
for the Accreditation of Educational Programs in Diagnostic Medical Sonography

Essentials/Standards initially adopted in 1979; revised in 1987, 1996, and 2007 by the:

- American College of Cardiology Foundation
- American College of Radiology
- American College of Obstetricians and Gynecologists
- American Institute of Ultrasound in Medicine
- American Society of Echocardiography
- American Society of Radiologic Technologists
- Society of Diagnostic Medical Sonography
- Society for Vascular Surgery
- Society for Vascular Ultrasound
- and
- Commission on Accreditation of Allied Health Education Programs

The Commission on Accreditation of Allied Health Education Programs (CAAHEP) accredits programs upon the recommendation of the Joint Review Committee on Education in Diagnostic Medical Sonography (JRC-DMS).

These accreditation Standards are the minimum standards of quality used in accrediting programs that prepare individuals to enter the Diagnostic Medical Sonography profession. The accreditation Standards therefore constitute the minimum requirements to which an accredited program is held accountable.

Standards are printed in regular typeface in outline form. Guidelines are printed in italic typeface in narrative form.

Preamble

The Commission on Accreditation of Allied Health Education Programs (CAAHEP) and the American College of Cardiology, American College of Radiology, American College of Obstetricians and Gynecologists, American Institute of Ultrasound in Medicine, American Society of Echocardiography, American Society of Radiologic Technologists, Society of Diagnostic Medical Sonography, Society for Vascular Surgery, and Society for Vascular Ultrasound cooperate to establish, maintain and promote appropriate standards of quality for educational programs in diagnostic medical sonography and to provide recognition for educational programs that meet or exceed the minimum standards outlined in these accreditation Standards. Lists of accredited programs are published for the information of students, employers, educational institutions and agencies, and the public.

These standards are to be used for the development, evaluation, and self-analysis of diagnostic medical sonography programs. On-site review teams assist in the evaluation of a program's relative compliance with the accreditation Standards.

Description of Profession

The profession of diagnostic medical sonography includes general sonography, cardiac sonography, vascular technology, and various subspecialties. The profession requires judgment and the ability to provide appropriate health care services. General sonographers, cardiac sonographers, and vascular technologists are highly skilled professionals qualified by education to provide patient services using diagnostic techniques under the supervision of a licensed doctor of medicine or osteopathy. The general sonographer, cardiac sonographer, and vascular technologist may provide this service in a variety of medical settings where the physician is responsible for the use and interpretation of appropriate procedures. General sonographers, cardiac sonographers, and vascular technologists assist physicians in gathering data necessary to reach diagnostic decisions.
The general sonographer, cardiac sonographer, and vascular technologist are able to perform the following:

- Obtain, review, and integrate pertinent patient history and supporting clinical data to facilitate optimum diagnostic results;
- Perform appropriate procedures and record anatomic, pathologic, and/or physiologic data for interpretation by a physician;
- Record, analyze, and process diagnostic data and other pertinent observations made during the procedure for presentation to the interpreting physician;
- Exercise discretion and judgment in the performance of sonographic and/or other diagnostic services;
- Demonstrate appropriate communication skills with patients and colleagues;
- Act in a professional and ethical manner;
- Provide patient education related to medical ultrasound and/or other diagnostic vascular techniques, and promote principles of good health.

The three learning concentrations are:
1. General (Defined as abdomen, obstetric, gynecologic, superficial parts, and other appropriate areas)
2. Cardiac (adult and fetal)
3. Vascular

I. Sponsorship
   A. Sponsoring Institution
      A sponsoring institution must be at least one of the following:
      1. A post-secondary academic institution accredited by an institutional accrediting agency that is recognized by the U.S. Department of Education, and authorized under applicable law or other acceptable authority to provide a post-secondary program which awards a minimum of a certificate at the completion of the program.
      2. A hospital or medical center or branch of the United States Armed Forces, or other governmental educational or medical service that meets post-secondary educational institution accreditation-equivalent standards.

   B. Consortium Sponsor
      1. A consortium sponsor is an entity consisting of two or more members that exists for the purpose of operating an educational program. In such instances, at least one of the members of the consortium must meet the requirements of a sponsoring educational institution as described in I.A.
      2. The responsibilities of each member of the consortium must be clearly documented as a formal affiliation agreement or memorandum of understanding, which includes governance and lines of authority.

   C. Responsibilities of Sponsor
      The Sponsor must assure that the provisions of these Standards are met.

II. Program Goals
   A. Program Goals and Outcomes
      There must be a written statement of the program’s goals and learning domains (cognitive, psychomotor, affective) consistent with and responsive to the demonstrated needs and expectations of the various communities of interest served by the educational program. The communities of interest that are served by the program include, but are not limited to, students, graduates, faculty, sponsor administration, employers, physicians, the public, and nationally accepted standards of roles and functions.

      Program-specific statements of goals and learning domains provide the basis for program planning, implementation, and evaluation. Such goals and learning domains must be compatible with both the mission of the sponsoring institution(s) and the expectations of the communities of interest. Goals and learning domains are based upon the substantiated needs of health care providers and employers, and the educational needs of the students served by the educational program.

   B. Appropriateness of Goals and Learning Domains
      The program must regularly assess its goals and learning domains. Program personnel must identify and respond to changes in the needs and/or expectations of its communities of interest.
An advisory committee, which is representative of these communities of interest, must be designated and charged with the responsibility of meeting at least annually, to assist program and sponsor personnel in formulating and periodically revising appropriate goals and learning domains, monitoring needs and expectations, and ensuring program responsiveness to change.

C. Minimum Expectations
The program must have the following goal(s) defining minimum expectations: "To prepare competent entry-level general sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains" and/or "To prepare competent entry-level cardiac sonographers in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains" and/or "To prepare competent entry-level vascular technologists in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains."

Programs adopting educational goals beyond entry-level competence must clearly delineate this intent and provide evidence that all students have achieved the basic competencies prior to entry into the field.

III. Resources

A. Type and Amount
Program resources must be sufficient to ensure the achievement of the program’s goals and outcomes. Resources include, but are not limited to: faculty, clerical/support staff, curriculum, finances, offices, classroom/laboratory facilities, ancillary student facilities, clinical affiliations, equipment/supplies, computer resources, instructional reference materials, and faculty/staff continuing education.

1. Support Staff
   a. Support staff should be available to provide counseling or referral for problems that may interfere with the student’s progress through the program. Guidance should be available to assist students in understanding course content and in observing program policies, and practices.

2. Clinical Resources
   a. Maximum student enrollment should be commensurate with the volume and variety of sonographic procedures, equipment, and personnel available for educational purposes. The number of students assigned to the clinical affiliate/clinical education center should be determined by a student/clinical staff ratio not greater than one-to-one, and a student/work station ratio of not greater than one-to-one.

   b. Programs should provide students with a variety of care settings in which sonographic and/or other diagnostic vascular procedures are performed on in-patients and outpatients. These settings may include the following: Ambulatory care facilities, Emergency/trauma, Intensive/critical/coronary care, Surgery, Angiography/cardiac catheterization

       (1) Each general learning concentration affiliate or clinical education center should perform approximately 1500 completed patient examinations, including production of permanent records and reports, per year, per student equivalent. The overall volume of procedures in which students participate in throughout the program should include a minimum of 30% ob/gyn procedures and a minimum of 30% abdominal procedures.

       (2) Each cardiac learning concentration affiliate or clinical education center should perform approximately 800 completed patient examinations, including permanent records and reports, per year, per student equivalent. The overall volume of procedures in which students participate in throughout the program should be representative of the range of cardiac procedures.

       (3) Each vascular learning concentration affiliate or clinical education center should perform approximately 1000 completed patient examinations, representative of the range of vascular procedures, including permanent records and reports, per year, per student equivalent. The overall volume of procedures in which students participate in throughout the program should be representative of the range of non-invasive vascular procedures.

   A student equivalent is defined as equal to one full-time student for one year.
B. Personnel
The sponsor must appoint sufficient faculty and staff with the necessary qualifications to perform the functions identified in documented job descriptions and to achieve the program’s stated goals and outcomes.

1. Program Director
a. Responsibilities
The program director must be responsible for the structure as well as the daily operation of the program, including organization, administration, periodic review and evaluation, continued development, and general effectiveness of program curricula. The program director ensures a schedule of regular visits to all clinical affiliates/clinical education centers is maintained. The responsibilities of the program director must not be adversely affected by educationally unrelated functions.

b. Qualifications
The program director must possess, at a minimum, the following:
- proficiency in curriculum development;
- appropriate credential(s) specific to the concentration(s) offered;
- the equivalent of two years full-time clinical experience as a general sonographer, cardiac sonographer, and/or vascular technologist; and
- an academic degree, not lower than an associates degree, and at least equal to that for which the students in the program are being prepared.

Program directors are encouraged to pursue advanced academic degrees.

Educational skills may include the following: curriculum development, instructional methodologies, evaluation and assessment

2. Clinical Coordinator(s)
Programs with eight or more clinical affiliates/clinical education centers must have an additional faculty member designated as the clinical coordinator. For programs with fewer than eight clinical affiliates/clinical education centers that do not have an additional faculty member designated as the clinical coordinator, the Program Director must have the qualifications and fulfill the responsibilities of the Clinical Coordinator.

a. Responsibilities
The clinical coordinator(s) must be responsible for coordinating clinical education with didactic education as assigned by the program director. Clinical education effectiveness must be evaluated and ensured through a schedule of regular visits to the clinical affiliate/clinical education centers. The clinical coordinator's responsibilities must include coordination, instruction, and evaluation. The responsibilities of the clinical coordinator must not be adversely affected by educationally unrelated functions.

b. Qualifications
The clinical coordinator(s) must possess, at a minimum, the following:
- proficiency in teaching methodology, supervision, instruction, evaluation, and guidance;
- appropriate credential(s) specific to the concentrations offered; and
- the equivalent of two years full-time professional experience as a general sonographer, cardiac sonographer and/or vascular technologist. Full-time is defined as 35 hours per week.

The clinical coordinator should document experience as a clinical or didactic instructor in a general sonography, cardiac sonography and/or vascular technology program. The instructor experience may have been attained concurrently with the professional experience requirement.

3. Medical Advisor
a. Responsibilities
The medical advisor must provide guidance that the medical components of the didactic and clinical curriculum meet current acceptable performance standards.

b. Qualifications
The medical advisor must be a United States licensed physician, Board certified in a medical specialty related to at least one of the learning concentrations offered by the program.
The medical advisor should participate in goal determination, curriculum development and outcomes assessment. The medical director/advisor is encouraged to participate in instruction.

4. Faculty and Instructional Staff
If the key personnel do not have all of the appropriate credentials for the learning concentrations offered, then there must be another faculty member with the appropriate credentials who will assume the didactic instruction and clinical evaluation responsibilities specific to that concentration.

All faculty must be familiar with program goals, be able to demonstrate the ability to develop an organized plan of instruction and evaluation, and have appropriate credentials for the learning areas they teach.

a. Didactic Instructor(s)
   (1) Responsibilities
   The instructional staff must be responsible for providing didactic content, evaluating students, reporting progress, and for the periodic review and updating of course material.

   (2) Qualifications
   The instructors must be individually qualified by education and experience, and be effective in teaching the subjects assigned.

b. Clinical Instructor(s)
   A clinical instructor must be identified for each clinical affiliate/clinical education center.

   (1) Responsibilities
   A clinical instructor must be available to students whenever he or she is assigned to a clinical setting, provide appropriate clinical supervision, and be responsible for student clinical evaluation. The program must provide a position description for a clinical instructor to carry out educational responsibilities.

   (2) Qualifications
   Clinical instructors must have the appropriate credential for the concentration they are teaching.

C. Curriculum
The curriculum must ensure the achievement of program goals and learning domains. Instruction must be an appropriate sequence of classroom, laboratory, and clinical activities. Instruction must be based on clearly written course syllabi describing learning goals, course objectives, and competencies required for graduation.

Recognizing the expanding body of knowledge in the profession, a desirable program-length goal for the core curriculum and one learning concentration, excluding requisites, is 18 months. Each additional learning concentration should encompass an additional six months of education.

1. Curriculum Requisites
   The following curriculum requisites must be met prior to the beginning of the core curriculum of the diagnostic medical sonography education program; they must be included in college level courses:

   a. Algebra, statistics, or higher mathematics course
   b. General college-level physics and/or radiographic physics
   c. Communication skills and
   d. Human anatomy and physiology

   The communication skills requisite may be met by a variety of courses including English, speech, or composition.
The following curriculum requisites must either be met prior to the diagnostic medical sonography education program or be presented as course work; courses may be presented within a course at the college level and must include the following:

e. Patient care  
f. Medical ethics and law  
g. Medical terminology and  
h. Pathophysiology

2. Master Plan  
The master plan of education must be sufficiently detailed to provide for continuity, delivery, and ongoing evaluation of the program in the event of staff changes. The master plan of education must be available for review.

Documentation of the program master plan of education should include the following:

- Philosophies and goals of the program and institution  
- Curriculum sequence with rationale  
- Course outlines, course descriptions, and performance (behavioral) objectives  
- Clinical education plan demonstrating correlation with the didactic curriculum  
- List of clinical affiliates and contact person for each site  
- Performance objectives for clinical education  
- Evaluation tools of learning concentration competencies  
- Grading policy  
- Objectives, evaluation tools, and grading criteria for each course  
- Description of evaluation methods for each course  
- Program policies  
- Internal and external mechanisms for evaluating program effectiveness

3. Learning Competencies Common to Each Concentration  
The minimum competency offered by the program must include the following:

a. Utilize oral and written communication.  
   (1) Maintain clinical records;  
   (2) Interact with the interpreting physician or other designated physicians with oral or written summary of findings as permitted by employer policy and procedure  
   (3) Recognize significant clinical information and historical facts from the patient and the medical records, which may impact the diagnostic examination;  
   (4) Comprehend and employ appropriate medical terminology, abbreviations, symbols, terms, and phrases; and  
   (5) Educate other health care providers and the public in the appropriate applications of ultrasound and other diagnostic vascular evaluation, including the following:  
      - Medical terminology  
      - Sonographic/other vascular terminology  
      - Pertinent clinical signs, symptoms, and laboratory tests  
      - Pertinent legal principles

b. Provide basic patient care and comfort.  
   (1) Maintain infection control and utilize standard precautions;  
   (2) Anticipate and be able to respond to the needs of the patient; and  
   (3) Identify life-threatening situations and implement emergency care as permitted by employer procedure, including the following:  
      - Pertinent patient care procedures  
      - Principles of psychological support  
      - Emergency conditions and procedures  
      - First aid and resuscitation techniques  
   (4) Proper patient positioning
c. Demonstrate knowledge and understanding of human gross anatomy and sectional anatomy.
   (1) Evaluate anatomic structures in the region of interest; and
   (2) Recognize the sonographic appearance of normal tissue structures, including the following:
      Sectional anatomy
      Embryology
      Normal sonographic patterns

d. Demonstrate knowledge and understanding of physiology, pathology, and pathophysiology.
   (1) Obtain and evaluate pertinent patient history and physical findings;
   (2) Extend standard diagnostic testing protocol as required by patient history or initial findings;
   (3) Review data from current and previous examinations to produce a written/oral summary of technical
       findings, including relevant interval changes, for the interpreting physician's reference and
   (4) Recognize examination findings that require immediate clinical response and notify the interpreting
       physician of such findings, including the following:
       Patient interview and examination techniques
       Chart and referral evaluation
       Diagnostic testing protocols related to specific disease conditions
       Physiology including blood flow dynamics
       Pertinent pathology and pathophysiology
       Pertinent legal issues

e. Demonstrate knowledge and understanding of acoustic physics, Doppler ultrasound principles, and
   ultrasound instrumentation.
   (1) Select the appropriate technique(s) for examination(s) being performed;
   (2) Adjust instrument controls to optimize image quality;
   (3) Perform linear, area, circumference, and other related measurements from sonographic images or data;
   (4) Recognize and compensate for acoustical artifacts
   (5) Utilize appropriate devices to obtain pertinent documentation
   (6) Minimize patient exposure to acoustic energy
   (7) Apply basic concepts of acoustic physics which include the following:
       Sound production and propagation
       Interaction of sound and matter
       Instrument options and transducer selection
       Principles of ultrasound instruments and modes of operation
       Operator control options
       Physics of Doppler
       Principles of Doppler techniques
       Methods of Doppler flow analysis
       Recording techniques
       Acoustic artifacts
   (8) Emerging Technologies

f. Demonstrate knowledge and understanding of the interaction between ultrasound and tissue and the
   probability of biological effects in clinical examinations, including the following:
   Biologic effects
   Pertinent in-vitro and in-vivo studies
   Exposure display indices
   Generally accepted maximum safe exposure levels
   ALARA principle

g. Employ professional judgment and discretion.
   (1) Protect the patient's right to privacy based on current federal standards and regulations;
   (2) Maintain confidentiality; and
   (3) Adhere to the professional codes of conduct/ethics through the following:
       Medical ethics
       Pertinent legal principles
       Professional interaction skills
Professional scopes of practice

h. Understand the fundamental elements for implementing a quality assurance and improvement program, and the policies, protocols, and procedures for the general function of the ultrasound laboratory, including the following:
   Administrative procedures
   Quality control procedures
   Elements of quality assurance program
   Records maintenance
   Personnel and fiscal management
   Trends in health care systems

i. Recognize the importance of continuing education, through the following:
   Professional journals
   Conferences
   Lectures
   In-house educational offerings
   Professional organizations and resources
   Recent developments in sonography
   Research statistics and design

j. Recognize the importance of, and employ, ergonomically correct scanning techniques:
   Personal fitness
   Supports, tools, and devices
   Equipment adjustments
   Patient positioning

4. The General Learning Concentration must include the following:

a. Demonstrate the ability to perform sonographic examinations of the abdomen, superficial structures, non-cardiac chest, and the gravid and nongravid pelvis according to protocol guidelines established by national professional organizations and the protocol of the employing institution utilizing real-time equipment with both transabdominal and endocavitary transducers, and Doppler display modes.

b. Recognize and identify the sonographic appearance of normal anatomic structures, including anatomic variants and normal Doppler patterns:
   Liver
   Biliary system
   Pancreas
   Urinary tract
   Adrenal glands
   Spleen
   Prevertebral vessels
   Peritoneal cavity, including potential spaces
   Gastrointestinal tract
   Noncardiac chest
   Neck
   Breast
   Scrotum
   Prostate
   Anterior abdominal wall
   Extremities
   Brain and spinal cord
   Musculoskeletal

c. Recognize, identify, and appropriately document the abnormal sonographic and Doppler patterns of disease processes, pathology, and pathophysiology of the structures listed in III.C.4.b. Modify the scanning protocol based on the sonographic findings and the differential diagnosis:
History and physical examination
Related imaging, laboratory, and functional testing procedures
Clinical differential diagnosis
Role of ultrasound in patient management

Sonographic and Doppler patterns in clinical diseases that may occur in the following categories:
- Iatrogenic
- Degenerative
- Inflammatory
- Traumatic
- Neoplastic
- Infectious
- Obstructive
- Congenital
- Metabolic
- Immunologic

d. Recognize and identify the sonographic appearance of normal anatomic structures of the female pelvis, including anatomic variants and normal Doppler patterns:
   - Reproductive system
   - Pelvic muscles
   - Suspensory ligaments
   - Peritoneal spaces
   - Pelvic vasculature

e. Recognize and identify the sonographic appearance of normal maternal, embryonic, and fetal anatomic structures during the first, second, and third trimesters:
   - Sectional anatomy
   - Pertinent measurement techniques
   - Doppler applications

f. Recognize, identify, and appropriately document the sonographic appearance of gynecologic disease processes, pathology, and pathophysiology:
   - History and physical examination
   - Related imaging, laboratory, and functional testing procedures
   - Differential diagnosis
   - Role of ultrasound in patient management

Abnormal sonographic patterns:
- Iatrogenic
- Degenerative
- Inflammatory
- Traumatic
- Neoplastic
- Infectious
- Obstructive
- Congenital
- Metabolic
- Immunologic
- Contraceptive devices
- Infertility procedures
- Doppler applications

g. Recognize, identify, and appropriately document the sonographic appearance of obstetric abnormalities, disease, pathology, and pathophysiology:
   - History and physical examination
   - Related imaging, laboratory, and functional testing procedures
   - Differential diagnosis
Role of ultrasound in patient management
Use of three-dimensional obstetric sonography
Abnormal sonographic characteristics in pregnancy:
  Placenta
  Congenital/genetic anomalies
  Growth abnormalities
  Amniotic fluid
  Viability
  Multiple gestation
  Fetal monitoring
  Maternal factors
  Postpartum
  Fetal therapy

h. Demonstrate knowledge and understanding of the role of the sonographer in performing interventional/invasive procedures.

5. The Cardiac Learning Concentration must include the following:
   a. Demonstrate knowledge of normal and abnormal cardiac anatomy:
      Embryology and fetal cardiac development
      Cardiac chambers and septation
      Valve anatomy and dynamics
      Coronary artery anatomy
      Relationships of cardiac chambers and great vessels
   b. Demonstrate knowledge of normal cardiovascular physiology:
      Hemodynamics
      Ventricular function, including influence of loading conditions and measurement of cardiac output
      Exercise physiology
      Electrophysiology and conduction system
      Pulmonary vascular disease
   c. Demonstrate knowledge and understanding of cardiac pathology, pathophysiology, and hemodynamics in different types of cardiac disease:
      Valvular heart disease
      Ischemic cardiac disease
      Cardiomyopathy
      Pericardial disease
      Congenital heart disease
      Cardiac neoplasms and masses
      Cardiac trauma
      Pulmonary vascular disease
      Diseases of the aorta and great vessels
   d. Demonstrate knowledge and understanding of clinical cardiology:
      Relationship of echocardiography to history and physical examination (including indications for echocardiography)
      Differential diagnosis as it relates to the echocardiographic examination
      Cardiovascular surgery and interventional cardiology
      Effect of systemic diseases on cardiovascular anatomy and physiology
e. Demonstrate knowledge of other cardiac procedures emphasizing indications, utility, and limitations of these procedures:
   Angiography and cardiac catheterization
   Electrocardiography, electrophysiologic studies, Holter monitoring
   Stress testing
   Radionuclide studies
   Other tomographic imaging procedures
   Phonocardiography and external pulse recording

f. Demonstrate proficiency in the performance of M-mode, two-dimensional, and Doppler (pulsed wave, continuous wave, color flow and power) echocardiographic studies.

g. Recognize, identify, and appropriately document the abnormal echocardiographic and Doppler patterns of disease, pathology, and pathophysiology for the disease categories listed

h. Demonstrate knowledge and understanding of the indications, utility, limitations, and technical procedures for related echocardiographic studies:
   Stress echocardiography
   Transesophageal echocardiography
   Intraoperative echocardiography
   Contrast echocardiography
   Three-dimensional echocardiography
   Echo-guided procedures

i. Demonstrate knowledge and understanding of clinical pharmacology as it relates to echocardiography and provocative maneuvers:
   Cardiovascular pharmacology
   Theory and use of provocative stress agents
   Non-pharmacologic stress
   Potential effects of cardiac medications on echocardiographic findings

j. Demonstrate knowledge, understanding, and proficiency in the use of quantitation principles applied to echocardiographic images and flow data:
   Standard M-mode, two-dimensional, and Doppler measurements and calculations
   Knowledge and understanding of normal and abnormal values for M-mode, two-dimensional and Doppler echocardiography
   Evaluation of normal and abnormal ventricular function
   Evaluation of the severity of valve stenosis and regurgitation
   Knowledge of normal and abnormal cardiovascular hemodynamics and flow patterns

6. The Vascular Learning Concentration must include the following:
   a. Demonstrate knowledge of normal and abnormal vascular anatomy:
      Extremity Arterial (upper and lower)
      Extremity Venous (upper and lower)
      Cerebrovascular: extracranial and intracranial
      Abdominal Vasculature: arterial and venous
      Special circulations: arterial and venous

   b. Demonstrate knowledge of normal and abnormal vascular physiology:
      Normal and Abnormal Arterial and Venous Hemodynamics: Flow physics
      Exercise physiology
      Effects of collateralization on Hemodynamics
c. Demonstrate knowledge and understanding of vascular physiology, pathophysiology, and hemodynamics in the different types of vascular disease/dysfunction:
   - Iatrogenic
   - Degenerative
   - Inflammatory
   - Traumatic
   - Neoplastic
   - Infectious
   - Obstructive
   - Congenital
   - Metabolic
   - Immunologic
   - Flow changes secondary to other states, e.g., cardiac diseases, pulmonary diseases, pregnancy, inflammatory diseases, intracranial and extracranial disease, anemia
   - Pharmacology

d. Demonstrate knowledge and understanding of clinical vascular diagnostic procedures:
   - Relationship of vascular diagnostic techniques to patient history and physical examination
   - Knowledge of appropriate indications for vascular examination
   - Differential diagnosis as it relates to vascular testing and examination
   - Vascular surgery and interventional vascular procedures including intravascular ultrasound, angioscopy, transluminal angioplasty with and without stenting, endartectomy, endarterectomy, patch graft endarterectomy, vein and synthetic vascular bypass procedures as well as embolectomy and thrombectomy, radio-frequency and laser vein ablation, endovascular repair

e. Demonstrate knowledge of other vascular procedures emphasizing indications, utility, and limitations of these procedures:
   - Angiography
   - Venography
   - Magnetic resonance angiogram
   - Magnetic resonance flow meters
   - Computed tomography
   - Nuclear medicine vascular procedures

f. Knowledge of importance and impact of other laboratory values and invasive and non-invasive testing/imaging modalities.

g. Demonstrate proficiency in the performance of physiologic testing (including volume pulse recording, pressure measurements, plethysmography, and stress testing), real-time ultrasound imaging, and Doppler evaluation (pulsed and continuous wave, color and power flow) as relates to the vasculature.
   - Vascular testing proficiency must be demonstrated in the following areas:
     - Extracranial Cerebrovascular
     - Intracranial Cerebrovascular (transcranial Doppler)
     - Extremity Arterial (upper and lower)
     - Extremity Venous (upper and lower)
     - Visceral Vascular (renal artery, mesenteric/splanchnic, hepatoportal)

h. Demonstrate knowledge and understanding of clinical pharmacology as it relates to vascular evaluation and stress testing:
   - Vasoactive relationships
   - Potential effects of medications on vascular diagnostic findings
i. Demonstrate knowledge, understanding, and proficiency in the use of quantitative principles applied to vascular testing:
   - Ankle/brachial pressure ratios
   - Segmental pressures
   - Aorta/renal ratios
   - Resistive index
   - Pulsatility index
   - Internal carotid artery to common carotid artery ratio
   - Percentage velocity change across stenosis for grading arterial lesions
   - Area and diameter reduction measurements
   - Knowledge of normal and abnormal vascular flow patterns and waveform morphology

D. Resource Assessment
The program must, at least annually, assess the appropriateness and effectiveness of the resources described in these standards. The results of resource assessment must be the basis for ongoing planning and appropriate change. An action plan must be developed when deficiencies are identified in the program resources. Implementation of the action plan must be documented and results measured by ongoing resource assessment.

IV. Student and Graduate (Outcomes) Evaluation/Assessment

A. Student Evaluation
   1. Frequency and purpose
      Evaluation of students must be conducted on a recurrent basis and with sufficient frequency to provide both the students and program faculty with valid and timely indications of the students’ progress toward and achievement of the competencies and learning domains stated in the curriculum.

      The supervising sonographer/vascular technologist should be identified on all student clinical education records.

   2. Documentation
      Records of student evaluations must be maintained in sufficient detail to document learning progress and achievements.

      Records indicating the number and type of procedures performed by the student, the examination findings, the extent of student supervision, and the level of involvement of the student in scanning/performance must be maintained and must document that all students meet the minimum numbers of procedures and types of procedures established by the program.

B. Outcomes
   1. Outcomes Assessment
      The program must periodically assess its effectiveness in achieving its stated goals and learning domains. The results of this evaluation must be reflected in the review and timely revision of the program.

      Outcomes assessments include, but are not limited to: national credentialing examination performance, programmatic retention/attrition, graduate satisfaction, employer satisfaction, and job (positive) placement. The program must meet the outcomes assessment thresholds.

      “Positive Placement” means that the graduate is employed full or part-time in a related field; and/or continuing his/her education, and/or serving in the military.

   2. Outcomes Reporting
      The program must periodically submit its goal(s), learning domains, evaluation systems (including type, cut score, validity, and reliability), outcomes, its analysis of the outcomes and an appropriate action plan based on the analysis.
V. Fair Practices

A. Publications and Disclosure
1. Announcements, catalogs, publications, and advertising must accurately reflect the program offered.

2. At least the following must be made known to all applicants and students: the sponsor’s institutional and programmatic accreditation status as well as the name, address and phone number of the accrediting agencies; admissions policies and practices; policies on advanced placement, transfer of credits, and credits for experiential learning; number of credits required for completion of the program; tuition/fees and other costs required to complete the program; policies and processes for withdrawal and for refunds of tuition/fees.

3. At least the following must be made known to all students: academic calendar, student grievance procedure, criteria for successful completion of each segment of the curriculum and graduation, policies for student leave of absence, exposure to blood borne pathogens, communicable diseases, and pregnancy, and policies and processes by which students may perform clinical work while enrolled in the program.

B. Lawful and Non-discriminatory Practices
All activities associated with the program, including student and faculty recruitment, student admission, and faculty employment practices, must be non-discriminatory and in accordance with federal and state statutes, rules, and regulations. There must be a faculty grievance procedure made known to all paid faculty.

A procedure should be established for determining that a student's health will permit him or her to meet the documented technical standards of the program.

C. Safeguards
The health and safety of patients, students, and faculty associated with the educational activities of the students must be adequately safeguarded.

The program must ensure voluntary and prudent use of students or other human subjects for non-clinical scanning. Students’ grades and evaluations must not be affected by participation or non-participation.

The combined total didactic/clinical involvement of the student in the program must not exceed 40 hours per week.

Students should be informed of and have access to the health care services provided to all other students of the institution.

D. Student Records
Satisfactory records must be maintained for student admission, advisement, counseling, and evaluation. Grades and credits for courses must be recorded on the student transcript and permanently maintained by the sponsor in a safe and accessible location.

E. Substantive Change
The sponsor must report substantive change(s) as described in Appendix A to CAAHEP/JRC-DMS in a timely manner. Other substantive change(s) to be reported to JRC-DMS within the time limits prescribed include:

1. Changes in affiliates
2. Added or deleted learning concentrations
3. Institution's mission or objectives if these will affect the program
4. Addition of courses that represent a significant departure in content or in method of delivery
5. Degree or credential level
6. Substantial change in clock or credit hours for successful completion of a program or in the length of a program.
F. Agreements
There must be a formal affiliation agreement or memorandum of understanding between the sponsor and all other entities that participate in the education of the students describing the relationship, role, and responsibilities between the sponsor and that entity.

The delineation of responsibilities should include student supervision, benefits, liability and financial arrangements, if any. The agreement should include a clause to protect students and to ensure due process.

An affiliate is an institution having adequate resources to provide a broad range of appropriate clinical education opportunities for students.

A clinical education center is a department, division, or other designated part of a clinical affiliate having adequate resources to provide clinical education opportunities for students. Multiple clinical education centers may be identified within a clinical affiliate.

APPENDIX A
Application, Maintenance and Administration of Accreditation

A. Program and Sponsor Responsibilities

1. Applying for Initial Accreditation
   a. The chief executive officer or an officially designated representative of the sponsor completes a “Request for Accreditation Services” form. The “Request for Accreditation Services” form can be found online via the CAAHEP website at www.caahep.org. The form can be completed online and submitted directly to the JRC-DMS via the CAAHEP website (preferred); completed online, printed, signed and mailed to the JRC-DMS; or it can be printed as a blank form, completed, signed and mailed to:

   JRC-DMS
   2025 Woodlane Drive
   St. Paul, MN 55125

   Note: There is no CAAHEP fee when applying for accreditation services; however, individual committees on accreditation may have an application fee.

   b. The program undergoes a comprehensive review, which includes a written self-study report and an on-site review.

   The self-study instructions and report form are available from the JRC-DMS. The on-site review will be scheduled in cooperation with the program and JRC-DMS once the self-study report has been completed, submitted, and accepted by the JRC-DMS.

2. Applying for Continuing Accreditation
   a. Upon written notice from the JRC-DMS, the chief executive officer or an officially designated representative of the sponsor completes a “Request for Accreditation Services” form.

   The “Request for Accreditation Services” form can be found online via the CAAHEP website at www.caahep.org. The form can be completed online and submitted directly to the JRC-DMS via the CAAHEP website (preferred); completed online, printed, signed and mailed to the JRC-DMS; or it can be printed as a blank form, completed, signed and mailed to the JRC-DMS.
b. The program may undergo a comprehensive review in accordance with the policies and procedures of the JRC-DMS.

If it is determined that there were significant concerns with the on-site review, the sponsor may request a second site visit with a different team.

After the on-site review team submits a report of its findings, the sponsor is provided the opportunity to comment in writing and to correct factual errors prior to the JRC-DMS forwarding a recommendation to CAAHEP.

3. Administrative Requirements for Maintaining Accreditation

   a. The program must inform the JRC-DMS and CAAHEP within a reasonable period of time (as defined by JRC-DMS and CAAHEP policies) of changes in chief executive officer, dean of health professions or equivalent position, and required program personnel.

   b. The sponsor must inform CAAHEP and the JRC-DMS of its intent to transfer program sponsorship. To begin the process for a Transfer of Sponsorship, the current sponsor must submit a letter (signed by the CEO or designated individual) to CAAHEP and the JRC-DMS that it is relinquishing its sponsorship of the program. Additionally, the new sponsor must submit a “Request for Transfer of Sponsorship Services” form. The JRC-DMS has the discretion of requesting a new self-study report with or without an on-site review. Applying for a transfer of sponsorship does not guarantee that the transfer of accreditation will be granted.

   c. The sponsor must promptly inform CAAHEP and the JRC-DMS of any adverse decision affecting its accreditation by recognized institutional accrediting agencies and/or state agencies (or their equivalent).

   d. Comprehensive reviews are scheduled by the JRC-DMS in accordance with its policies and procedures. The time between comprehensive reviews is determined by the JRC-DMS and based on the program’s on-going compliance with the Standards, however, all programs must undergo a comprehensive review at least once every ten years.

   e. The program and the sponsor must pay JRC-DMS and CAAHEP fees within a reasonable period of time, as determined by the JRC-DMS and CAAHEP respectively.

   f. The sponsor must file all reports in a timely manner (self-study report, progress reports, annual reports, etc.) in accordance with JRC-DMS policy.

   g. The sponsor must agree to a reasonable on-site review date that provides sufficient time for CAAHEP to act on a JRC-DMS accreditation recommendation prior to the “next comprehensive review” period, which was designated by CAAHEP at the time of its last accreditation action, or a reasonable date otherwise designated by the JRC-DMS.

Failure to meet any of the aforementioned administrative requirements may lead to administrative probation and ultimately to the withdrawal of accreditation. CAAHEP will immediately rescind administrative probation once all administrative deficiencies have been rectified.

4. Voluntary Withdrawal of a CAAHEP-Accredited Program

Voluntary withdrawal of accreditation from CAAHEP may be requested at any time by the Chief Executive Officer or an officially designated representative of the sponsor writing to CAAHEP indicating: the desired effective date of the voluntary withdrawal, and the location where all records will be kept for students who have completed the program.
5. Requesting Inactive Status of a CAAHEP- Accredited Program

Inactive status may be requested from CAAHEP at any time by the Chief Executive Officer or an officially designated representative of the sponsor writing to CAAHEP indicating the desired date to become inactive. No students can be enrolled or matriculated in the program at any time during the time period in which the program is on inactive status. The maximum period for inactive status is two years. The sponsor must continue to pay all required fees to the JRC-DMS and CAAHEP to maintain its accreditation status.

To reactivate the program the Chief Executive Officer or an officially designated representative of the sponsor must notify CAAHEP of its intent to do so in writing to both CAAHEP and the JRC-DMS. The sponsor will be notified by the JRC-DMS of additional requirements, if any, that must be met to restore active status.

If the sponsor has not notified CAAHEP of its intent to re-activate a program by the end of the two-year period, CAAHEP will consider this a “Voluntary Withdrawal of Accreditation.”

B. CAAHEP and Committee on Accreditation Responsibilities – Accreditation Recommendation Process

1. After a program has had the opportunity to comment in writing and to correct factual errors on the on-site review report, the JRC-DMS forwards a status of public recognition recommendation to the CAAHEP Board of Directors. The recommendation may be for any of the following statuses: initial accreditation, continuing accreditation, transfer of sponsorship, probationary accreditation, withhold accreditation, or withdraw accreditation.

   The decision of the CAAHEP Board of Directors is provided in writing to the sponsor immediately following the CAAHEP meeting at which the program was reviewed and voted upon.

2. Before the JRC-DMS forwards a recommendation to CAAHEP that a program be placed on probationary accreditation, the sponsor must have the opportunity to request reconsideration of that recommendation or to request voluntary withdrawal of accreditation. The JRC-DMS reconsideration of a recommendation for probationary accreditation must be based on conditions existing both when the committee arrived at its recommendation as well as on subsequent documented evidence of corrected deficiencies provided by the sponsor.

   The CAAHEP Board of Directors’ decision to confer probationary accreditation is not subject to appeal.

3. Before the JRC-DMS forwards a recommendation to CAAHEP that a program’s accreditation be withdrawn or that accreditation be withheld, the sponsor must have the opportunity to request reconsideration of the recommendation, or to request voluntary withdrawal of accreditation or withdrawal of the accreditation application, whichever is applicable. The JRC-DMS reconsideration of a recommendation of withdraw or withhold accreditation must be based on conditions existing both when the JRC-DMS arrived at its recommendation as well as on subsequent documented evidence of corrected deficiencies provided by the sponsor.

   The CAAHEP Board of Directors’ decision to withdraw or withhold accreditation may be appealed. A copy of the CAAHEP “Appeal of Adverse Accreditation Actions” is enclosed with the CAAHEP letter notifying the sponsor of either of these actions.

   At the completion of due process, when accreditation is withheld or withdrawn, the sponsor’s Chief Executive Officer is provided with a statement of each deficiency. Programs are eligible to re-apply for accreditation once the sponsor believes that the program is in compliance with the accreditation Standards.

   Any student who completes a program that was accredited by CAAHEP at any time during his/her matriculation is deemed by CAAHEP to be a graduate of a CAAHEP-accredited program.
